Clinical Indications for Admission to Recovery Facility

[Return to top of Bipolar Disorders - RFC](#)

- Skilled nursing facility (SNF) or subacute facility care is/was needed for appropriate care of patient because of **ALL** of the following:
 - There are no acute hospital care needs.(1)
 - The patient has [Intense and complex care needs](#) that make recovery facility care safer and more practical than attempting care at a lower level and **ALL** of the following^[A](3):
 - These care needs include the multiple components of care that are delivered by skilled professionals at a recovery facility.^[B]^[C]^[D]
 - There is a plan to provide **ALL** of the following⁽¹³⁾:
 - Care plan management and evaluation to meet patient needs, achieve treatment goals, and ensure medical safety⁽¹⁴⁾
 - Observation and assessment of patient's changing condition to evaluate need for treatment modification or for additional procedures until condition stabilized
 - Education services to teach patient self-maintenance or to teach caregiver patient care⁽¹⁵⁾⁽¹⁶⁾
 - [Skilled care](#) treatments daily (or more frequent), including **1 or more** of the following:
 - Nursing treatments needed for **1 or more** of the following⁽¹⁷⁾:
 - Intravenous (IV) infusion, IV injection, or intramuscular (IM) injection⁽¹⁾⁽¹⁵⁾⁽¹⁸⁾
 - Wound management that requires dressing changes with prescription medication or clean technique and treatment for **1 or more** of the following⁽¹⁾:
 - Open lesions
 - Treatment with 2 or more ulcers, including venous ulcers, arterial ulcers, or stage II pressure injuries
 - Widespread skin disorder treatments⁽¹⁵⁾
 - Patient care training and assistance for **1 or more** of the following⁽¹⁹⁾:
 - Exercise program (eg, range of motion, pulmonary, cardiac)⁽²⁰⁾
